

# Free Education Webinar!!

Dandle-LION Medical is inviting you to attend an online webinar and receive 1.0 FREE nursing CE credit.

Topic:

## *Moving Beyond the Basics: Neurodevelopmental Positioning in the NICU*

When: Friday, April 15<sup>th</sup>, 2011

Time: 0900 Pacific Time /1200 Eastern Time

### Why you want to attend:

**Neurodevelopmental Care** is a philosophy of care that embraces the individual competency of the sick or preterm infant and supports the baby's sensory, motor, social-emotional and cognitive skills. Providing support for the developing musculoskeletal system is a key component of this care and is vitally important for future developmental milestones and the promotion of a calm, regulated state. The webinar will help caregivers of all disciplines understand how optimal positioning can improved both long and short term outcomes.

### During this one-hour webinar, we will explore:

- The unique characteristics of musculoskeletal maturation in the preterm infant
- The most common adverse consequences of mal-positioning
- Recommendations for dynamic positioning that supports the developing neuromotor system
- How applying these principals at the bedside will ultimately having a positive impact on the long-term developmental outcome of the infant.

### Presenter:

**Chrysty Sturdivant, OTR**, has been a practicing neonatal therapist for over 20 years. She is an international speaker and consultant, patented inventor, published author and President of Neonatal Therapy Solutions.
