

Dandle • LION Cozy Cub™

Bead Boundary

The Cozy Cub:

- Provides containment while allowing full visualization, making it ideal for the ECMO, cardiac or surgical infants
- Allows immediate access to the infant in emergencies
- Loop at one end helps caregiver adjust device to fit any size baby

- Useful for patients with unique or critical positioning needs
- Easily adaptable for use with medical equipment
- Capable of providing calming flexion during transport
- Size: 48" long, 5.5" wide
- Packaged with a cotton cover (Replacement cotton covers and disposable covers available)

The Cozy Cub is a pellet-filled boundary that is very helpful for bigger babies or those with special positioning needs. The small internal pellets are smooth and almost feel silky. Unlike more formed boundaries, the Cozy Cub can get into nooks and crannies to provide support exactly where it is needed. Developed originally for ECMO and post-surgical patients, the Cozy Cub can be used for premies under bili-lights, babies who are more agitated, or any baby who just needs a little 'more.'
